Color Touch Heating Thermostat

- This Thermostat is a digital thermostat, which is designed for electric floor heating system or water heating system. Using 4.3inch color touch LCD display, the working status can be easily understood. With built-in four languages, you can select the languages you want to display.
- With five modes, the system can work according to your desired pre-set temperature conveniently. And the 5+1+1 days programmable function, which is easy-to-program on/off settings per day.
- Simple regulation which sends On/Off commands to the heating system according to a pre-selected temperature variation. The thermostat control algorithm includes an anticipation function which reduces the discrepancy between the thermostat reading and the temperature at the centre of the room.
- Choose from three (3) sensor setting: Ambient (built-in sensor)- to control the air temperature; Floor - to control the temperature using the floor probe; Ambient and Floor - to control the ambient air, and show floor temperature by using the floor probe.
Product Features

- 4.3inch Color Touch Screen Operation
- Electric Heating System(Max.16A) or Water Heating System(Max.3A)
- Adjustable Comfort Mode, Economy Mode, Party Mode, Holiday Mode and Program Mode Control
- 5+1+1 Days Programmable
- External and Internal Sensor Select
- Four languages select: English, French, Germany, Dutch
- Clock and Date Display
- Temp. Clibration
- Temp. Protection
- 86*86mm mounting

Technical Data

- Voltage:　230V, 50/60Hz
- Load Current: 16A(Max)
- Temp. Setting Range:　5~35℃
- Ambient: 0~50℃
- Sensor: NTC10K，3950ohms at 25℃
- Accuracy: ± 0.5℃
- Protection Class: IP30

Screen and Display

| 1	ON/OFF Button	Use to turn on/off Thermostat
